

# THANKSGIVING SAFETY TIPS

PeakErgo.com

01

## Fire Safety

Confirm that smoke alarms are operational, keep a handy fire extinguisher nearby, and educate family members about its proper use. Never leave cooking unattended.

02

## Food Handling Guidelines

Follow proper handling and cooking procedures. Thaw the turkey in the refrigerator, refrain from washing it, and cook it to an internal temperature of 165°F (74°C). Promptly refrigerate leftovers, and ensure that all guests are aware of any potential allergens in the dishes served.

03

## Travel Safety

Perform a thorough check of your vehicle's condition, ensuring tires, brakes, and lights are in optimal working order. Plan for rest breaks to prevent driver fatigue, and always encourage passengers to use seat belts.

04

## Home Safety Procedures

Remove tripping hazards, secure rugs, and ensure proper lighting, particularly in common areas. Keep walkways clear and provide ample seating to prevent overcrowding.

05

## Ergonomic Considerations

Provide comfortable seating options and arrange furniture to accommodate good posture during social activities. If games or activities are planned, ensure that participants can engage in them without straining their bodies.
